

HUMANISED MILK.

THE Zyime Peptolizing Powders (Fairchild) yield a food for infants which is pronounced by the highest medical authorities the safest and best physiological substitute for mother's milk. In these Powders the Caseine of Cow's milk is modified and predigested, and other essential components so applied as to yield a product almost identical in physiological, chemical, and physical properties with human milk.

Zyime Peptolizing Powders (Fairchild) are supplied by all Chemists.

INTIMATIONS.

NOW READY.

The Daily Press.

THE CHRONICLE AND DIRECTORY.

With which is incorporated
THE CHINA-DIRECTORY.
TWENTY-NINTH ANNUAL ISSUE,
COMPLETE, WITH APPENDIX, PLATE, &c.,
ROYAL 8vo, p. p. 1,100—\$5.00,
SMALLER EDITION, Royal 8vo, p. p. 750—\$3.00.

THE CHRONICLE AND DIRECTORY
has been thoroughly revised and greatly enlarged.
It is re-arranged on a new plan, much more
convenient for reference, and is printed from
New Type on thicker paper than last issue.

Orders may be sent to *Daily Press* Office, where
it is published, or to any of the following Agents:

HONGKONG—Messrs. F. Blackhead & Co.

HONGKONG—Mr. W. Brewster

HONGKONG—The Hongkong Traders Co.

HONGKONG—Messrs. L. & C. Crawford & Co.

HONGKONG—Messrs. A. S. Watson & Co.

MACAO—Mr. A. A. da Cunha

LAST FEW DAYS

GREAT CLEARANCE SALE

WINES AND SPIRITS

BY APPOINTMENT.

A. S. WATSON & CO., LIMITED.
(ESTABLISHED A.D. 1841.)

We invite attention to the following old and
Brandis, all of which are excellent quality and
good value for the money.

The same being specially selected by our
London House, and bought direct from the most
noted Shippers, are imported in wood and bottled
by ourselves, thus enabling us to supply the best
grapes and most carefully.

Now in ordering it is only necessary to state
the name and quantity of Wine or Spirit wanted,
and initial letter for quality desired.

Orders through Local Post or by Telegram
receive prompt attention.

POETS. (For Inscriptions and general use.)

Per Bot.

A Alto Douro, good quality.

1-19.

HONGKONG, FEBRUARY 3RD, 1891.

The delivery of the English mail was begun
at 6.25 p.m. yesterday.

The P. & O. steamer *Conqueror*, the retiring
Governor of Madras, arrived here yesterday
at that port at 5 p.m. on the 31st ultimo.

There were 2,400 visitors to the City Hall
Museum last week, of whom 1,644 were Europeans.

The Russian gun-boat *Varshav*, Captain
Filieff, arrived here yesterday morning from
Nagasaki.

The Agents (Messrs. Butterfield & Swaine) in
charge of the O. S. Co.'s steamer *Nestor*, from
Liverpool, left Singapore yesterday morning for
Hongkong.

In our notice of the Choral Society's per-
formance in yesterday's issue, we inadvertently
stated that Miss Weston was among the
singers who decorated the orchestra; the name should
be Mrs. Weston.

On the 17th January Colonel Sempronius H.
Boyd, the new American Minister to Siam, had
audience of the King and on the same occasion
Colonel Child, the retiring Minister, presented
his letters of recall.

We are requested to state that as the Fancy
Dress Ball in Government House will not be held
at the same time as the annual ball of the
Society which is to be held on the 28th January,
we have arranged for the members to have
a ball on the 27th January.

A man was arrested a few days ago at Bangkok
whilst attempting to set fire to a house. When
interrogated by the police he said he
had come to burn a fire in the hope of getting
a sum of money. He was sent to the Central
Police Station and was held in custody until
the trial on Saturday morning, the 24th January.

Men in "a vast mountain comprising the centre of each cathedral, around which are the Kali-selas or concentric circles of rock, and beyond these the four Mahadillas or great Continents. —Marries to the height of 34,000 yoyanas; one yoyana is 12 miles above the ocean. At its summit is the head of the Kavatishwa gods. It is often called Mahameru."

A small date at its foot, the young son of Royalty was received by his uncle, H.R.H. Somdech Chow R. Bhanueng, and conducted into a special pavilion, where he was received by the King. The King arrived shortly afterwards, and after a few words of greeting, who sought arrest to put the police off the scent.

THE COMMANDER OF THE EAST INDIA AND MEDITERRANEAN SQUADRONS.

—LONDON, 14th January. It is expected that Rear-Admiral Robinson will be appointed to the command of the East India Squadron. Vice-Admiral Sir J. Tyron has been appointed to succeed Admiral Sir D. Hoskyns in command of the Mediterranean Squadron.

DR. O'BRIEN'S LITTLE.

—BERLIN, 15th January. Dr. Koch published a paper in which he discusses the composition of his lymph. It consists mainly of glycine and an extract derived from cultivated colonies of bacilli.

MR. GLADSTONE AND MR. BALFOUR'S FRIEND.

—LONDON, 16th January. Mr. Gladstone has forwarded fifty pounds towards Mr. Balfour's distress fund.

MR. PARSONS.

—LONDON, 16th January. Mr. O'Brien's newspaper, which is called *Truth*, announces that Mr. Parsons has consented to retire from the leadership of the Liberal party.

STEAMER WRECKED.

—LONDON, 16th January. The steamer *Carrie*, bound for Bombay, has grounded on the reefs between the two islands, and after long and painful efforts, succeeded in getting the steamer off, and in a stricken state, then passed to the adjacent State port, where he was soon more arrayed in royal robes, worked with gold and studded with pearls. The culminating feature of the ceremony was the *Holy Apparition*, when the King, dressed in the robes of a Buddhist priest, presented him with consecrated water to drink and anoint himself with. Afterwards the Prince was conducted to the summit of the mount, where he received the blessing of his Royal father, in the presence of the King of Siam, and after a few minor observances, they were both conducted back to the Palace in the same order in which they had proceeded.

The processions and the immense concourse of which they were composed were admirably organized by H.R.H. Prince Prachak, the Lord High Commissioner, and the whole scene was a picture of great splendour, elegance and graceful taste. Looking at the fair treasury of the towering pyramids, the brilliant dresses and fantastic scenery, and hearing the weird blaring of shrill trumpets, combined with the more melodious strains of Oriental music and the shrill voices of voices, it was difficult not to forget for a time that this was to be used with a desire to indulge in indecent enjoyment and live the life of the Lotus Eater.

—BANGKOK TIMES.

KOBE.

A dividend of 9 per cent. per annum, says the *Kobe Yushin Nippo*, was declared at the general meeting of the Kobe Electric Light Co. held on the 1st January.

Holding themselves to the inevitable, the Kobe Tramway Company have determined to make their terminus just outside the Concession, that is, if permission is granted to them to run through Sakai-machi.—*Yoko Nippon*.

Princess Sadae died on the morning of the 1st January, at her residence in the 1st District. Her Highness was one of the old Daimios who after passing through many vicissitudes, after the fall of feudalism eventually realized a large fortune by land speculations in Kobe. A representative who called at his house in the afternoon was informed that as the occurrence had not yet been reported to the authorities no information could be given.—*Kobe Kyo*.

OSAKA.

A dividend of 10 per cent. per annum was declared at the half-yearly general meeting of Nagoya Electric (Native and Foreign Co.), of Nagoya, on the 30th January. The net proceeds during the latter half of last year were 14,366,461.

We deeply sympathize, says the *Osaka Asahi Shimbun*, with the family of Mr. Nakivell in their sorrow for his loss. The Misses Nakivell, wishing to search for him around Osaka and Saitama, applied to the 22nd January to the Water Police of Saitama, who at once sent a launch, and also for an interpreter and a constable to accompany them. The officials granted their request, and sent out a steam launch.

Osaka, 16th January. The latest advice from Valparaiso states that the Chilean Army is blockading the coast, but the Army remains staunch to the Government. —LONDON, 15th January.

Advice from Valparaiso states that the Chilean rebels have landed in the Conception, where troops have been despatched to endeavor to surround them. The Chilean revolt has arisen owing to a contest between the President and the Congress. The rebels at Entro Rie have been dispersed, and the alarm first in the previous was subsiding.

—LONDON, 16th January. The latest advice from Valparaiso states that the Chilean rebels have three ironclads and the majority of the fleet in their possession, while the Government has only one ironclad and eight torpedo boats. Business is entirely suspended. A manifesto has been issued by the President to the Chilean people, in which he accuses the Congress of violating the constitution.

THE AGE OF CONSENT QUESTION.

—CALCUTTA, 16th January. At yesterday's meeting of the Legislative Council Sir Andrew Steele introduced a Bill to amend the Indian Peasants' Act, so as to increase the age of consent from 16 to 18 years. A long discussion ensued. The Vicerey, in a lengthy speech, expounded the measure, and stated that no new offence was created under the Bill. The question of child marriage and the Hindu Marriage Law was, he said, not touched upon. The Honourable Sir Andrew Steele, who introduced the Bill, and the Court, opposed the measure on the ground that it was an interference with orthodox Hindu laws and customs. The Honourable Mr. K. L. Mukherjee supported it, inasmuch as it afforded a certain extent of protection against the physical violation of a class of helpless children among large masses of the people. The Bill was ordered to be published.

—LONDON, 16th January. The London correspondent of the *Bombay Gazette* writes that The Times, a leading article on Sir Andrew Steele's Bill for the protection of child-wives in India, objects to the proposal to extend the age of protection to 18 years, as being too low, and that the Vicerey for having been too cautious in the question of conjugal rights. The Times remarks that it will not be satisfied that enough has been done until the discretion of the Courts in such cases has been much enlarged.

SCIENTIFIC MISCELLANY.

—Spiders, says Mons. F. Houmet, have eight legs, but previous to the ingenious experiments of Mons. Carlet it was not known how they walk. The learned professor of Grenoble made a comparative study of the walk of four, six and eight-legged animals. For example, the centipede, the six-legged animal, walks alternately, advancing the two legs of the same side (first and third) with the over leg (second) of the opposite, while they are receding upon the three others. The three-legged spider walks with the two legs of the same side, while the horse has two gaits, for it can amble or alternately advance one of the fore legs with the hind ones of the opposite side. The movements of lizards, frogs and turtles in the same way, prove that they have the same number of limbs. Insects simultaneously and alternately advance the odd legs of the same side (first and third) with the over leg (second) of the opposite, while they are receding upon the three others. The three-legged spider walks with the two legs of the same side, while the horse has two gaits, for it can amble or alternately advance one of the fore legs with the hind ones of the opposite side. The movements of lizards, frogs and turtles in the same way, prove that they have the same number of limbs. Insects simultaneously and alternately advance the odd legs of the same side (first and third) with the over leg (second) of the opposite, while they are receding upon the three others. The three-legged spider walks with the two legs of the same side, while the horse has two gaits, for it can amble or alternately advance one of the fore legs with the hind ones of the opposite side. The movements of lizards, frogs and turtles in the same way, prove that they have the same number of limbs.
